

Mixed 2nd Growth Hardwood-Conifer Stand

Acres of Douglas fir monoculture

Types of mixed species management

- A. Mixed species within a stand
- B. Mosaic of pure timber types (mini-mono's)

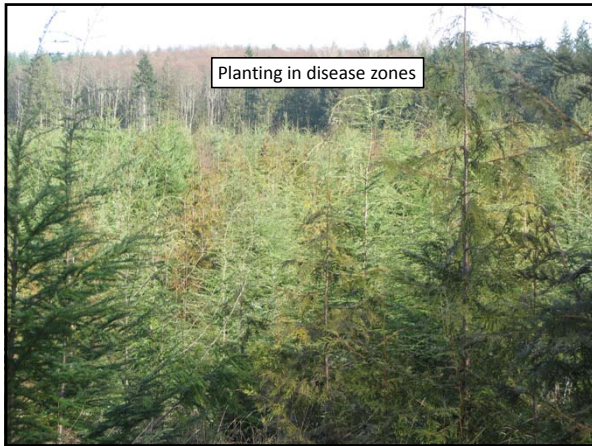

Our Reasons for Mixed Species Management

1. Micro site issues
 - a) Wet areas
 - b) Shade zones
 - c) Disease pockets
 - d) Naturals
2. Disease control – Swiss Needle Cast
3. Diversification of forest products – wider marketing opportunities
4. Possible synergistic effects on tree growth and wood quality – greater wood yield/acre
5. Animal control
